

#### **04/15/2006 - O P SOLUTIONS INTRODUCES NEW WEBSITE**

O P Solutions is pleased to introduce our new website. Our intention is to keep our user base and the public up-to-date with matters involving our company, our software and the IP industry. Among other things, users can now download quarterly law updates directly from the website. Of special note is the products tab which is an excellent resource for both current and prospective customers.

#### **04/01/2006 - O P SOLUTIONS TO EXHIBIT PRODUCTS AT UPCOMING INTA MEETING IN TORONTO**

We will be attending the International Trademark Association Meeting in Toronto in early May. We will be front and center in Booth #120 as you enter the Metro Toronto Convention Center Exhibit Hall. Hours will be 12:30 - 4:30pm on Sun May 7th, 8:30am - 4:00pm on Mon May 8th and 8:30am to 2:00pm on Tues May 9th and Wed May 10th.

#### **04/01/2006 - USPTO OVERHAULING PATENT E-FILING**

On March 16, 2006 the USPTO released its EFS Web System. EFS-Web is a web-based patent application and document submission system. Advantages of using the system include faster processing and confirmation, reduction in fees for a small entity and reduction in paperwork. Many forms are not yet available and the PTO in a recent teleconference stated that the forms may only come available at a rate of two every six months. PATTSY's PTO forms library can be used in conjunction with the Adobe PDF distiller to create some of the documents required for submission. We will be keeping a close eye on the PTO's progress in an effort to provide more robust tools in the near future. For answers to frequently asked questions visit the USPTO's website at [http://www.uspto.gov/ebc/efs\\_faq.htm](http://www.uspto.gov/ebc/efs_faq.htm)

#### **01/01/2006 - PATTSY WAVE READY FOR COMMERCIAL DISTRIBUTION**

O P Solutions is pleased to announce the release of our new Microsoft® .Net connected application, PATTSY WAVE. WAVE incorporates the familiar functionality of our existing PATTSY product with all the advantages of a browser-based interface. For more information please visit the [...Products Tab](#)
